

› Laced framed › UB design › Custom sheds

Offering a range of industrial, commercial and agricultural
shed solutions built on strength and experience.

Australian owned and family operated for over 20 years

The Compliant Steel team know steel and they also know sheds. They will listen to your needs and work with you to build a steel shed solution that works for you.

You will experience the difference of a high quality product built on strength delivered by a friendly, approachable team that truly aim to create a hassle free experience and make your job easy.

How will the personable team at Compliant Steel assist you?

- Extensive experience in the steel industry
- Knowledge of the shed market and compliance requirements
- Quality 100% Australian steel shed solutions
- In-house design and engineering support team
- Council application and planning guidance
- Streamlined quoting facilitating the ease of price calculation and option selection
- Rigging and erection team
- Coordination of supporting trades (if required)

Compliant Steel prefabricated shed kits in either laced framed or UB design are superior in performance and offer:

- Choice of opening widths and access space
- 100% Australian materials - locally fabricated and produced steel
- Corrosion resistant and heavy duty steel
- Lighting and ventilation options
- Range of quality cladding
- Columns and rafters designed and fabricated using universal beam structure
- Galvanised purlins and girts
- Range of span widths and shed heights to suit purpose
- Internal wall, door and flooring options
- Guttering and downpipe systems
- Variety of standard bay sizes and roof pitch styles (kit dependent).

Our steel shed options are endless

LACED FRAMED

The Compliant Steel laced framed sheds span 16m, 20m and 24m delivering a flexible and strong solution to your shed requirements.

CUSTOM SHEDS

Our in-house design and engineering team have the capability and experience to develop a full custom shed solution for your intended use.

UB DESIGN

Our heavy duty Universal Beam (UB) steel shed provides increased span width and durability features.
